Connecting Ireland's Critical Networks

Founded in 1924, Wood Communications is a specialist Irish distributor helping customers source, specify and deliver network solutions for enterprise, data centre, telecoms and security environments.

We combine trusted products, extensive stock held in Dublin, and responsive service to ensure fast, nationwide availability with same-day dispatch on many items.

More than just a distributor, we provide expert technical advice, system design input, and practical guidance. Known for being reliable and easy to deal with, we partner with globally recognised manufacturers to deliver high-quality, scalable network solutions tailored to real site requirements – helping to keep your projects moving and reduce delays.

Alcadon Group

Backed by Alcadon Group

Wood Communications combines the responsiveness and local knowledge of our Irish team with the strength and reach of Alcadon Group's European specialist distribution network.

For our customers, this means broader product access, stronger supplier relationships and additional technical expertise, all delivered through the Wood Communications team in Dublin.

Supporting Your Projects from Specification to Delivery

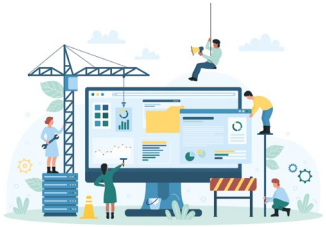

Our services are designed to help you source the right solutions, reduce project risk and deliver reliable network infrastructure with confidence.

Wood Communications supports enterprise, telecoms, data centre and other critical environments with network infrastructure solutions, technical product guidance, project support and logistics, and certified and bespoke training.

What we offer:

Network Infrastructure Solutions

Technical Product Guidance

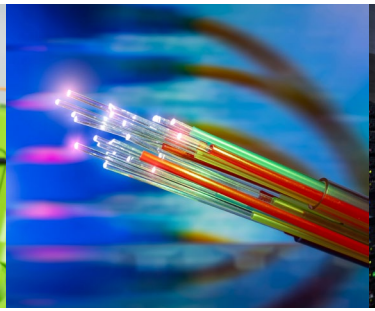

Project Support & Logistics

Certified & Bespoke Training

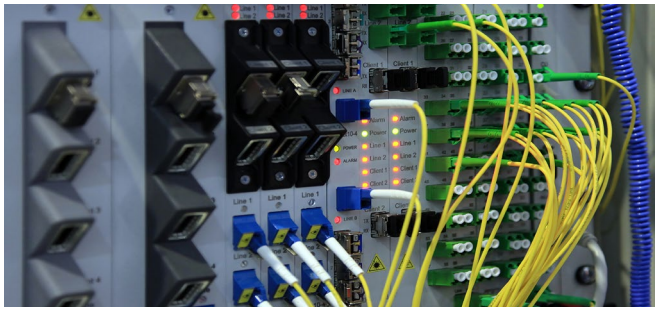

Optimising Your Network Infrastructure

Network Infrastructure Solutions

We help customers design, source and deliver reliable network infrastructure for commercial, enterprise, telecoms and data centre projects.

- Copper and fibre structured cabling, including high density fibre
- Racks, cabinets and power distribution
- Network testing, labelling, IP networking and security solutions
- Solutions from trusted global manufacturers, including Corning, Legrand and CNET Cabling Systems
- Extensive stock held in Dublin, with logistics support for projects across Ireland and Europe

Technical Product Guidance

Our experienced team helps customers select and specify the right products from the outset, reducing delays, rework and specification risk.

- Product selection and specification support
- Advice on suitable ranges and configurations
- Access to supplier and manufacturer technical expertise
- Support from initial consultation through procurement and deployment
- Practical guidance for installation requirements

Helping customers reduce delays, improve project efficiency and make confident technical decisions.

SOLUTION SPOTLIGHT:

Mercury transforms data centre labelling with Silver Fox

From one month to just three days

As Silver Fox's authorised distributor in Ireland and an approved supplier to Mercury, Wood Communications provided fast local access to the Fox-in-a-Box® system and Patch Panel Module.

By bringing label production on site, Mercury reduced the turnaround time for 30 to 40 patch panels from around one month to just three days, while gaining greater control over the process and achieving more consistent label quality.

> **"What used to take a month now takes just three days. It's saving us time and reducing costs on site."**
>
> **Karthikeyan Pillai**
> Project Manager, Mercury

SILVER FOX® Exceptional Labelling - No Hassle

Services That Add Value Beyond Product Supply

Certified & Bespoke Training

We provide certified and bespoke technical training for installation teams, consultants and technical professionals working across network infrastructure and data centre environments.

- Recognised qualifications and certification pathways
- Courses tailored to customer and team requirements
- Training that is practical and hands on, covering fibre, copper, structured cabling and data centre disciplines
- Globally recognised EPI data centre training, independently accredited and examined by EXIN
- Classroom, Virtual Instructor-Led Training and Training On Demand options available across selected courses

Project Support & Logistics

Fast, reliable supply backed by technical expertise to keep your project moving.

- Specification and product sourcing support
- Same day dispatch on many stocked items
- Nationwide and European delivery options
- Technical expertise when you need it
- Ongoing post-installation guidance

Training, Accreditation and Certification

Trusted Partners. Proven Solutions.

Working with Trusted Manufacturers

We partner with leading global manufacturers to deliver reliable, high-performance solutions across data centre, enterprise, telecoms and security environments.

Through these established relationships, customers gain access to proven products, specialist technical expertise and dependable sourcing support for complex infrastructure projects.

Sustainability & Compliance

The Documentation Your Project Requires

Specifications, tenders and project handovers increasingly require clear environmental and compliance information. We help customers access the relevant manufacturer documentation without having to chase multiple suppliers.

Across selected product ranges, this can include Environmental Product Declarations, Product Environmental Profiles, CPR and DoP documentation, and RoHS and REACH statements.

We have also removed single use plastic packaging from selected CNET products. Local stockholding and coordinated deliveries can help reduce split shipments, excess packaging and unnecessary journeys to site.
